### Further Information

Investors should be aware of the fact that the value of investments can decrease as well as increase. Therefore, a positive performance in the past - even if it relates to longer periods - is no reliable indicator of a positive performance in the future. The risk of price and foreign currency losses and of fluctuations in return as a result of unfavorable exchange rate movements cannot be ruled out. There is a risk that investors will not receive back the full amount they originally invested. Forecasts are not a reliable indicator of future performance. In the case of simulations the figures refer to simulated past performance and that past performance is not a reliable indicator of future performance.
